

Show off your smile,
not your retainer.

Getting Your Braces Off?

Traditional steel retainers that leave you hiding an unsightly “wire smile” are a thing of the past. Now you can confidently show off your beautiful new smile with the Clearbow! The Clearbow retainer boasts a clear plastic strap engineered to provide you with superior aesthetics and greater comfort. Unlike stainless steel wires, the Clearbow is gentle on teeth and much more durable! Ask your doctor today if the Clearbow is right for you; **extra charges for choosing Clearbow may apply.**

Advantages of the Clearbow

Aesthetic

Show off your beautiful new smile without feeling self-conscious.

Virtually Unbreakable

Unlike steel wire retainers, the plastic Clearbow strap is incredibly durable and practically indestructible!

Gentle on Tooth Enamel

Your Clearbow, unlike harsh stainless steel, will never scratch teeth when inserted or removed.

Superior Tooth Contact

Your Clearbow uniquely presents a concave design that fully contacts the teeth. This wider tooth surface contact provides better retention for superior long-term results.

FAQ

Does the plastic Clearbow strap contain any BPA?

The plastic Clearbow strap is made with BPA-free materials sourced only from the US.

Will boiling water affect the plastic Clearbow strap?

The plastic Clearbow strap is resistant to temperatures up to 250 degrees Fahrenheit, allowing you to freely drink your favorite hot beverages without removing your retainer.

Is the plastic Clearbow strap resistant to stains?

When cleaned daily, according to our instructions and used under normal conditions, your Clearbow will remain free from stains and scratches.

Has the plastic Clearbow strap been tested?

The plastic Clearbow strap has been tested over a time span of two years on more than 3000 patients without a single breakage. Patients are very happy with the aesthetics and report feeling uniquely comfortable with the premium Clearbow retainer.

I have a steel wire, can it be replaced with the Clearbow?

In most cases the steel wire on your retainer can be replaced with the Clearbow. Please ask your doctor for more information.

Clearbow Retainer

- Optimum Tooth Contact
- Gentle on Teeth
- Aesthetic

Steel Wire Retainer

- Minor Tooth Contact
- Scratches Teeth
- “Unsightly (solder joints turn black over time)”.
