**SCIENTIFIC FIELDS OF WORK AND STUDY**

- Involved in self-ligating brackets and research since 1975.
- Conducted research and has lectured at the University of Toronto for more than 14 years with an emphasis on bonding and adhesion.
- Has published 28 articles in refereed journals. He has lectured on bonding and bracket mechanics throughout Europe and North America.
- Has been speaker at many National Orthodontic meetings in Europe, Australia, Spain, and North America.

**COURSE PROGRAM**

*To provide the clinician with an overview of the benefits and drawbacks of self-ligating bracket systems. To show how the self-ligating technique can solve regular and complex cases easily.*

- What is out there; are there differences?
- Why are more people moving to self-ligating systems?
- How do I decide on the right system for me and my treatment mechanics?
- Passive vs. Active: Is there really a difference?
- "Pearls", you want to consider before settling on the right system.
- The transition from regular to self-ligating.
- Scheduling, staffing considerations.
- Comparing Speed®, Damon®, In-Ovation® and Quick® bracket systems.
- Looking back: 30 years of SL treatment; where we are today, and where are we going?

**MEETING SCHEDULE**

8:00am.....Registration	12:00pm - 1:00pm.....Lunch
8:30am - 10:30am.....Difference in the Marketplace/is it right for my practice?	1:00pm - 2:30pm.....Active or Passive systems
