ORLANDO, FLORIDA

Saturday, March 17, 2007 8:30 a.m.— 4:30 p.m.

Emmett Griffiths, President of Rideau Orthodontic Mfg. Ltd. will share his experience as an orthopedic/orthodontic laboratory owner celebrating his 35th year. Mr. Griffiths attended seminars with many of the pioneers of FJO in the late 1960's and early 1970's with his father, a 'functionally orientated' Montreal Orthodontist. He has organized post-graduate CE courses for 30 years and lectured extensively at Symposiums and Study Clubs.

Lecture Objectives: The clinician will receive an overview of various functional appliances and their benefits prior to fixed bracket therapy. Fixed arch development and the latest advancement in orthodontics using low-friction self-ligating brackets explaining their technique along with actual case studies.

Full Day Presentation Outline:

- Evolution of Orthodontics & Functional Jaw Orthopedics
- Importance of Good Records for Treatment Planning
- Keys to Case Selection
- Functional Appliances
- Fixed Appliances
- Alternative Lightwire Functional (ALF)
- Sleep Apnea Appliances
- How to increase patient compliance with Functional Appliances
- Appliance Adjustments
- How to get more torque from your bracket system
- **Benefits of Low-Friction Self-Ligating Bracket Systems**
- Tripoding for Vertical
- Retention
- Bicuspid Removal/2nd Molar Replacement
- Air Rotor Slenderizing (ARS)
