

INDIRECT TRIPODING

**REDUCE TREATMENT TIME BY
SIX TO TWELVE MONTHS**

**IDEAL FOR DEEP BITE CLASS I
OR HALF TOOTH CLASS II**

- More hygienic and effective than a Rick-a-nator, MARA or Herbst.
- Immediately increase vertical gain
Temporomandibular joint/disc space.
- Eliminates the muscle responses caused by occlusal guidance.
- Balanced template system dramatically reduces chair time.
- Demarcation layer offers precise reduction upon removal.

✓ **Complete Custom Indirect Tripoding**
Information available at www.orthodontic.ca

E&OE 2010

- ✓ Tripoding is not suggested for full tooth Class II patients. A Twin Block or alternative Fixed/Removable Class II repositioning appliance may be more suitable.
- ✓ Class II Division II cases would require fixed bracket treatment to align the maxillary arch prior to tripoding in order to eliminate deflection of the mandible into Class I.
